### **About ONC-ATCB 2011/2012 Certification**

The ONC-ATCB 2011/2012 certification program tests and certifies that EHR technology is capable of meeting the 2011/2012 criteria approved by the Secretary of Health and Human Services (HHS). The certifications include Complete EHRs, which meet all of the 2011/2012 criteria for either eligible provider or hospital technology and EHR Modules, which meet one or more – but not all – of the criteria. ONC-ATCB certification aligns with Health Information

Technology: Initial Set of Standards, Implementation Specifications, and Certification Criteria for Electronic Health Record Technology published in the Federal Register in July 2010 and strictly adheres to the test procedures published by the National Institute of Standards and Technology (NIST) at the time of testing. ONC-ATCB 2011/2012 certification conferred by InfoGard Laboratories does not represent an endorsement of the certified EHR technology by the U.S. Department of Health and Human Services nor does it guarantee the receipt of incentive payments.

### **About InfoGard Laboratories**

InfoGard is an Authorized testing and Certification Body[ATCB]under the Office of the National Coordination for Health Information Technology[ONC]to test and certify Electronic Health Record[EHR]system.

The first laboratory accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) from the National Institute of Standards and Technology (NIST), InfoGard meets the quality requirements that will apply in the permanent ONC-ATCB. Working on secure technology testing and validation for nearly 20 years, InfoGard has gained the trust of numerous governments and private industry throughout the world. InfoGard works closely with healthcare information technology Vendors to test and certify EHR systems which enable their users to qualify for Stage 1 Meaningful Use requirements. ## About Renesan

Renesan Software is a leading provider of software in the renal (kidney dialysis) segment of the health care information technology industry. Renesan's advanced EHR applications provide comprehensive solutions for capturing and managing data generated in dialysis units and vascular access centers.

"This is our great achievement and joy to have been awarded with the ONC-ATCB certification. Our goal is to help dialysis units and access centers to become completely paperless by using our EHR without disrupting their current work flow. These applications help renal health care professionals to capture data easily from various sources (including dialysis machines and labs), provide timely information to billing and other applications, and report selected data to networks. In addition to this our software helps dialysis units and access centers in maintaining a proactive continuous quality improvement program to improve overall outcomes and quality of patient care."- **Neeraj Sinha, CEO of Renesan Software**
